-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 October 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, drawn to a method for detecting one or more metastatic lesion comprising administering to and imaging a subject an effective amount of a labeled molecule comprising amino acid sequence SEQ ID NO: 1, classified in class 424, subclass 9.1.
- II. Claims 1-17, drawn to a method for detecting one or more metastatic lesion comprising administering to and imaging a subject an effective amount of a labeled molecule comprising amino acid sequence SEQ ID NO: 2, classified in class 424, subclass 9.1.

Inventions are distinct each from the other because of the following reasons:

Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01).

The methods of Group I and differ in the method objectives, method steps and parameters and in the reagents used. The instant specification does not disclose these methods would be used together. Group I is directed to a method of detecting one or more metastatic lesion using antigen binding molecule having SEQ ID NO:1 . Group II is method of detecting one or more metastatic lesion using antigen binding molecule having SEQ ID NO: 2. Each invention performs this function using a structurally and functionally divergent material. The methodology and materials necessary for one group differ significantly for each of the materials.

The distinct material using in invention Group I and II have a separate status in the art require separate searches. Searching all the invention groups together in US patent and non-patent literature would impose serious search burden. Therefore, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reason given above and have acquire a separated status in the art by their different classification, restriction for examination purpose as indicated is proper.

Art Unit: 1642

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lei Yao, Ph.D. whose telephone number is 571-272-3112. The examiner can normally be reached on 8am-6.00pm Monday-Thursday.
